Only incompatibility I had was with RivaTuner Statistics Server Credits: This reddit post for exposing a possible fix, which I built upon.. Q: Why use this plugin instead of simply changing the fMaxTime ini value A: To get the best performance you basically want the fMaxTime value to be as high as possible (for example 0.

This means that you would either have to lock your framerate or settle with a possible performance loss.. Make sure to set the HavokFix ini setting MinFPS accordingly if you plan to use it 60 FPS or lower.. This plugin is my take on having an easy way to play at higher framerates without said performance loss.. This allows you to have an unlocked framerate without suffering from HAVOKs issues. brocade visio shapes library

Havok Object Zip File Into YourHow to Install: Just install with your favorite mod manager or extract the zip file into your Skyrim game folder.. How it works: Skyrims physics engine (HAVOK) is designed to run at 60 fps If your game runs on higher framerates some bugs can appear (Water splash sounds, water flickering, animals flying, objects moving by themselves, etc..) Havok Object Zip File Into YourYou can fix this by setting the fMaxTime value in your ini according to your framerate - but this method can lead to performance loss depending on the amount of Havok objects around you.. FAQ: Q: Do I need this if I play 60 FPS locked A: It depends on your PC mod setup.. Easy and performance-friendly way to play Skyrim above 60 FPS This author has not provided any additional notes regarding file permissions. ae05505a44 Weather Watcher Live Serial Key
